

# What type of fish do we eat?

Key Competences: Learn to speak and interact in different languages (vocabulary)

Process information and build new knowledge through interpreting data..

Interpret data and write different types of texts Creation of communicative contexts: Recepies and 360º Videos

Use of foreign language as an instrument of universal information access

Collect, present and interpret information about different situacions 21st century skills: collaboration, critical thinking, decision making,

**Links to the curricula:** Legislative reference regarding the

LOMCE<a href="https://www.edu.xunta.gal/portal/sites/web/files/curriculo\_eso\_completo.pdf">https://www.edu.xunta.gal/portal/sites/web/files/curriculo\_eso\_completo.pdf</a>

# Foreign language Block 1. Oral

and creativity

communication: listening and speaking B1.1. Comprehension, interpretation and evaluation of oral texts

B1.3. Listening actively while complying with the basic rules that favor communication

**Biology.** *Bloque 3. A biodiversity no planeta Terra* **B3.5.** Vertebrates: fish, amphibians, reptiles, birds and mammals. Anatomical and physiological characteristics **B3.13** Diet and health. Balance diet. Design and analysis of diets. Healthy nutritional habits

#### Maths Block 2. Numbers and al algebra

B2.2. Use the types of numbers and operations, together and exchange information, and solve problems related to educational life.

**Technology.** *Bloque 2.* Expression and technical communication: Using 360° camera and Round me App.

#### Tasks:

Do a research work on what type of fish do students in three countries participant countries eat? to do that they use a Suvey monkey questionaire.

Studens represents and analyze the graphic results

Studenst do and ebook with the most most typical fish and recipes in participant countries.

Students analyze the fish markets in the thhree countries and do a 360° video about the markestin the three participant countries

# Project phase;

**Explore:** Prepare de questionaire and apply it to students in participant countries

# **Analyse & Explain**

Analyze the results in different countries

## **Implement**

Produce the graphics  $\,$  and analyze them . Healthy nutritional habits through dieting Extract conclusions.

Produce recipes

Produce a 360° vídeo about gish markets in three countries

# Communicate results:

Students in gruops present the results of each country. The  $4^{th}$  team presents the conclusions.

## **Digital tools:**

Personal computer or iPad Whiteboeard

#### camera360º and Round me

Suvey Monkey Bookcreator or Publish Excel programme

#### Assessment:

Assess the regularity and consistency of daily work.

Self assesment

Peer assesment (group) using white board by reflecting in their diary about their own activity/work

- 1. What they have achieved
- 2. Difficulties encountered
- 3. What needs improving
- 4. Strengths

## **Learning outputs:**

Enjoy communication in a foreing language Make plans about own learning Apply the scientific method to a daily activity

Achieve knowledge from data analysis

Be able to create different communicative contexts

Collect, present and interpret information about different situacións.

Analyze and evaluate the errors in the process of personal learning

Analyze and learn from other group activities Learn from feeback

# **Groupping:**

Individual work for Questionaires Pair works for recepies

Groups of five studens for 360° videos and communication of results

# Title: What type of fish do we eat?

**Teacher: Milagros Trigo** 

School: CPI Plurilingüe O Cruce Class: 2° B

### Tasks:

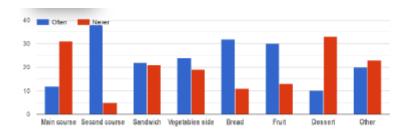

1. Make a research work in order to know what type of fish and how much fish do students eat everyweek and which are the differents between countries. The results will be analyzed and shared among the three participant countries. Students answer the questionaire

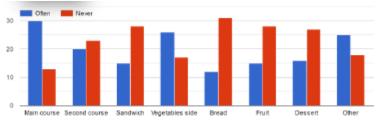

Questionaire link: <a href="https://enquisas.cesga.es/index.php/719396">https://enquisas.cesga.es/index.php/719396</a>

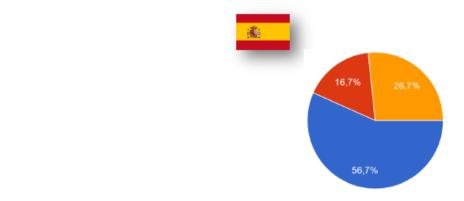

Students analyze the results in different countries and comapre them . Each school/team write their conclusions.

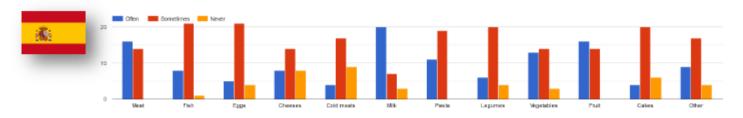

- **2.** Create three weekly menus with different prices. They must include a balanced diet and reach the purchasing power of different families
- **3.** Students will create the most typical recipes with fish in each country (or area) and will publish them using bookcreator or publish
- **4.** Students visit a fish market in each country take videos with the camera 360° and with the program *Round me* they in groups of 5 introduce the fish they eat in each country. These videos will be presented to their classmates by a propup of five students and They are assessed by other group of five students.

# **EXAMPLES** of results from questionaire

# Phases of the project

The teacher will assess all project phases using an observation sheet.

<b>Explore</b>	analize, explain and document	Implement	<u>communicate results</u>

The teacher will use it to asses students or students for Self-assessment

Project rubrica				
Student; Project:	1	2	3	4
Being able to understand, interact and				
communicate in foreign languages.				
Achieve knowledgeusing a different				
language (CLIL)				
Planning and carrying out investigations.				
Plan an investigation individually and				
collaboratively, how measurements will be				
recorded, and how many data are needed to				
support a claim.				
Conduct an investigation and/or evaluate				
and/or revise the experimental design to				
produce data to serve as the basis for
